INTELLIGENT MEDICATION MANAGEMENT SYSTEM

General Healthy's Intelligent Medication Management System integrates various kinds of Ward Management Cabinets, utilizing IOT and advanced software to receive prescriptions in real time. It guarantees safe storage, intelligent management and rapid delivery, ensuring the whole process of medication management traceable with integrated hardware and software.

FEATURES

Authentication and Management

Fingerprint or ID card login,
Graded security management.

Dual-lock Authentication

Employs dual-lock authentication to ensure precise control over high-risk medications.

Empty Bottle Recycling

Reminds users to recycle empty bottles.

**Emergency Unlocking System**

Allows for manual access under emergent situations like power or network cuts.

Toxic Drug Management Module

Each storage cell has a lockable lid (opens according to prescription after dual authentication.)

Drug Sensing Management Module

All access records updated in real time.

Refrigerated Drug Management Module

Allows storage at 2-8°C with real-time temperature and humidity displayed.

Boxed Drug Management Module

Manages large boxed drugs in batches, with each storage slot assigned and quantity monitored.

Single-Dose Injection Management Module

Ensures precise single-dose dispensing of ampoules or vials based on medical orders or instructions.
