## SOLUTIONS: AUTOMATED OUTPATIENT PHARMACY

## PRODUCTS

### AUTOMATIC DISPENSING MACHINE

General Healthy's Automatic Dispensing Machine is designed for storing and distributing drugs in bulk. In the process of distribution, it also allows for rapid and uninterrupted refilling of various drugs in batches. Together with its modern designs and small footprint, it streamlines the pharmaceutical layout and meets the requirements of a modern pharmacy.

#### Multi-Drug Dispensing

Dispenses all drugs in one prescription at one time.

#### Reliable Conveyance

Transfers drugs reliably through conveyors, lifts, drug outlets and spiral delivery routes.

#### Drug Identification

Detects similar drugs, drugs in different doses and high-risk drugs.

#### Drug Replenishment

Refills drugs in round bottles or vials in batches with two robotic arms, two waiting plates and four refilling channels.

#### Free Dropping

Faster delivery by gravity.

#### Various Types

Accommodates drugs in boxes, vials, round bottles etc.

#### Automatic Replenishment

Refills drugs from two waiting channels without human intervention.

#### Error Correction

Automatically corrects errors without human assistance.
